Dear Hiring Manager,

I am a fourth-year Bachelor of Science in Computer Science student specializing in Software Engineering at iACADEMY Cebu, currently seeking an **OJT/Internship opportunity** where I can gain hands-on industry experience, contribute to a professional team, and continue developing my skills. This is also a school requirement, with a minimum commitment of 480 hours.

Throughout my studies, I have gained experience in software development, web development, game development, UI/UX design, IT support, and project management. Through various academic and personal projects, I have had the opportunity to design interfaces, develop functional applications and games, and collaborate with others. I also have **good English communication skills**, which allow me to work effectively in environments where communication and customer interaction are important.

I am also comfortable using AI-assisted tools as part of my workflow for research, problem-solving, and development, while ensuring that I understand and take responsibility for the solutions I implement.

I consider myself an **adaptable and motivated learner**. I value teamwork and communication, and I am comfortable learning new concepts and working with others to accomplish a shared goal.

While my primary background is in software and technology, I am open to **OJT opportunities in different roles** where I can contribute my technical, creative, organizational, and communication skills. So, I am open to roles such as administration, customer service, technical support, creative work, video editing, finance, and human resources. I am willing to learn new responsibilities and believe that my skills can be valuable in a **variety of professional environments**.

Thank you for taking the time to learn more about me. I would be grateful for the opportunity to contribute to your organization and grow as part of your team.

Sincerely,

Earl Jarod Rebalde
